

Join us for a Special Presentation:

CHILL THE DRILLS

“Oil Development and Climate Change in America’s Arctic”

PRESENTER: Kit McGurn
Sierra Club National Arctic Organizer
(2 Showings)

Wednesday, 10/21 at 7:00 PM – at University of Buffalo
Thursday, 10/22 at 7:00 PM – at Daemen College

(Check the Sierra Club – Niagara web-site at <http://newyork.sierraclub.org/niagara> after 9/5/09 for building, room and directions.)

The Arctic ecosystem on the North Slope of Alaska represents a microcosm of the realities that society at large faces with regard to fossil fuel dependence, climate change, and the importance of protecting our last wild and pristine places. Come learn what is being done to protect this iconic American landscape and what you can do to help. **FOR ADDITIONAL INFORMATION:**
