

Green Homes Website Launched

For most people, the journey towards a more sustainable lifestyle begins at home. That's why, as part of our mission to help people explore, enjoy, and protect the planet, we're pleased to announce the launch of our partner website, Sierra Club Green Home (SCGH), which was created to help individuals make their homes more energy-efficient, ecologically sustainable, and healthy.

For the past year, we've worked closely with the SCGH team to create a website that provides a wealth of information regarding environmentally friendly products and practices relating to every aspect of home life. Sierra Club Green Home should serve as a powerful resource for Chapter and Group leaders who are interested in helping their members and general citizens embrace more sustainable lifestyles.

Just to give you a better idea of what SCGH offers, the following are just a few exclusive features included on the site:

SCGH Home Carbon Calculator to help determine a home's carbon footprints and suggest ways to lower it.

SCGH Home Health Quiz to help people evaluate the healthiness of their homes and to tap into educational facts on bettering indoor air quality.

SCGH Net Solar Costs Calculator to determine the exact costs and benefits of adding solar technology to a home.

SCGH directory of GreenCheck-authorized providers of green products and services.

Recycling Center Locator to help you find the nearest center to recycle all your materials, from motor oil to batteries.

Low Carbon Diet Calculator to allow you to compare the relative carbon impacts of your food choices.

Coming soon, Sierra Club Green Home will also offer a tool for selecting healthy, eco-friendly paint that includes an Ayurveda Quiz.

We're excited about the launch of Sierra Club Green Home and hope you will join us on May 28th for a personal tour of the site. Should you have any questions or concerns about the webinar, feel free to contact Regan Ranoa at regan.ranoa@sierraclub.org
